

Healthy Volunteers Needed for Hematological Studies

NIH...Turning Discovery Into Health®

Doctors at the National Institutes of Health (NIH) seek healthy volunteers for a research study that is collecting bone marrow samples from healthy adults. Samples will be used for clinical research in the Hematology Branch and are essential for many research projects, including studies of normal and abnormal blood cells in the human body, blood diseases, the role of the immune system in marrow failure, and the genetic risk factors for aplastic anemia.

YOU MAY QUALIFY IF YOU:

- Are a healthy adult
- Have a BMI less than or equal to 26 (To calculate your BMI, go to <https://go.usa.gov/xHgDz>)
- Are willing to undergo a bone marrow biopsy

STUDY DESIGN:

- You will have a physical exam and lab tests ahead of the procedure
- All study procedures will take place at the NIH Clinical Center
- Compensation for your participation will be provided

STUDY LOCATION:

The NIH Clinical Center, America's Research Hospital, is located on the Metro red line (Medical center stop) in Bethesda, Maryland.
